GeoHUB and Zoning By-law webmap are officially live!

Our new zoning webmap provides a convenient way to find the zoning of any property within the township. The Township of Wellesley GeoHUB will serve as the hub for all public facing GIS (Geographic Information Systems) content such as web mapping applications, and pdf maps. Currently, this site only houses the zoning webmap, however, we aim to make continuous updates and improvements to our GeoHUB going forward! A link to our new GeoHUB which contains the zoning webmap can be found on the home page of our website and on the Zoning page under the “Doing Business” tab.
